Dermoscopic Aspects of Chronic
Plaque Psoriasis

Yashvee Shah, MPH

NYU MPH | Implementation Science & Public Health Professional
| Program Strategy, Partnerships & Health Systems | Translating
Evidence Into Real-World Impact
New York, United States

Summary

I'm an NYU MPH graduate working at the intersection of implementation science, health systems, partnerships, and equity-centered public health. My experience spans public health research, program management, stakeholder engagement, monitoring & evaluation, and evidence-to-practice translation across academic, nonprofit, and community-based settings. My work spans climate-health, disaster preparedness, adolescent sexual and reproductive health, mental and behavioral health, urban and community health, and NCD prevention — across research, implementation, and program delivery contexts in the US, India, Latin America and the Caribbean, and the MENA region. I'm particularly interested in how public health interventions are implemented, evaluated, and sustained in complex delivery environments where data, feasibility, operations, and equity intersect. My experience includes implementation-focused research, systematic and scoping reviews, qualitative and mixed-methods analysis, multilingual survey implementation, GIS-based analysis, and cross-sector collaboration to support measurable and sustainable public health impact. Tools & Methods: SPSS · Stata · R · REDCap · Tableau · ArcGIS · QGIS · Mixed-Methods Research · Qualitative Analysis · GIS Mapping · Monitoring & Evaluation Frameworks · Systematic & Scoping Reviews · Program Management

Experience

ISEE Lab at NYU School of Global Public Health
Graduate Research Student
May 2025 - Present (1 year 2 months)
New York, United States

Contribute to implementation science and health systems research, supporting ongoing lab studies.

Assist with literature screening, data extraction, and synthesis for peer-reviewed research outputs.

Support research deliverables aligned with evidence-to-practice translation.

Collaborate with faculty and graduate researchers on analytical tasks and reporting.

Medicuture Foundation

3 years 8 months

General Secretary

April 2024 - Present (2 years 3 months)

Mumbai

Established organizational governance by drafting bylaws and MoUs, setting operational standards for 200+ team members and ensuring regulatory compliance.

Led fundraising and recruitment efforts, successfully organizing three major events and onboarding personnel for various program roles.

Managed logistics for over 180 health camps, marathons, and community events, ensuring efficient execution and maximum outreach.

Designed and implemented over 200 community healthcare projects, directing initiatives on general health screenings and mental health awareness, and delivering seminars tailored to diverse populations.

Co-Chairperson Mental Healthcare Wing

November 2022 - May 2025 (2 years 7 months)

Mumbai, Maharashtra, India

Led projects involving community mental health awareness and screening.

Research and development of questionnaires for screening camps.

Joint Secretary

November 2022 - April 2024 (1 year 6 months)

Mumbai, Maharashtra, India

NYU Applied Global Public Health Initiative

Graduate Research Associate

September 2024 - May 2026 (1 year 9 months)

New York, NY

Conduct research on the intersection of adolescent sexual & reproductive health (ASRH) and climate change in collaboration with PAHO-linked initiatives.

Support regional deliverables for Central America and the Caribbean, contributing to global health research outputs.

Conduct qualitative research, including stakeholder interviews across Latin America and the Caribbean.

Contribute to disaster preparedness manuscript and climate resilience analysis using a public health lens.

Global Action for Urban Health Lab
Graduate Research Student
September 2024 - May 2026 (1 year 9 months)
New York, NY

Designed and developed a strategic outreach guide and webinar in collaboration with the New York Academy of Medicine, aimed at improving health communication and service access among aging minority populations.

Conducted needs assessment through literature reviews with long-term application for public health outreach programs.

New York University
5 months

Course Assistant
August 2025 - December 2025 (5 months)
New York, United States

Course assistant for Introduction to Global health

Support instruction and course delivery serving large graduate-level cohorts. Assist with grading, student support, and course coordination, ensuring timely feedback and academic quality.

Facilitate student understanding of global health systems, social determinants, and behavioral frameworks.

Strengthen skills in academic coordination, communication, and instructional support within a fast-paced university setting.

Course Assistant
August 2025 - December 2025 (5 months)
New York, United States

Course Assistant for Global Issues in Social and Behavioral Health

Support instruction and course delivery serving large graduate-level cohorts. Assist with grading, student support, and course coordination, ensuring timely feedback and academic quality.

Facilitate student understanding of global health systems, social determinants, and behavioral frameworks.

Strengthen skills in academic coordination, communication, and instructional support within a fast-paced university setting.

The New York Academy of Medicine

Public Health Intern

June 2025 - August 2025 (3 months)

New York, United States

Supported planning for the Health Systems Implementing Climate Action (HSICA) Convening at Climate Week NYC 2025.

Drafted concept notes, meeting summaries and stakeholder outreach materials for potential speakers and partners.

Contributed to grant development, including sections of the Burroughs Wellcome Fund Letter of Intent and creating visual materials to strengthen the proposal.

Conducted background research and developed briefing documents for a climate-health book proposal.

Created tailored materials to engage diverse cross-sector stakeholders, advancing NYAM's mission to promote equity-centered climate action.

Healis Sekhsaria Institute for Public Health

Project Intern

October 2023 - May 2024 (8 months)

Navi Mumbai, Maharashtra, India

Analyzed program implementation across 197 schools, tracking activities and spillover effects to assess program progress.

Conducted a systematic literature review of 18 studies, distilling key findings from 8 critical papers and presenting them to panel of researchers to shape future study directions.

Ensured seamless functionality of the TFT-TFS app and coordinated endline surveys with 197 school program in-charges, expediting data collection for timely project completion.

Optimized multilingual surveys (English, Hindi, Marathi) on REDCap and developed a KIIS questionnaire for qualitative analysis.

Strengthened intervention adherence by executing follow-up calls and successfully conducted 122 endline interviews.

Revamped social media engagement strategies, boosting LinkedIn and Instagram follower reach by 1,820% through targeted content and live-streaming of press conferences.

Conducted statistical analysis on the link between menopause and depression using the PHQ-9 scale in SPSS, uncovering significant results.

Biosetup Lifesciences

Student Intern

June 2023 - July 2023 (2 months)

Completed an intensive internship on Machine Learning & Data Science applications in In-silico Biotechnology & Bioinformatics, gaining expertise in computational approaches for biological data analysis.

Developed proficiency in Python-based machine learning models, applying statistical and predictive analytics to genomic and proteomic datasets.

Conducted data preprocessing, feature selection, and model optimization to enhance the accuracy of bioinformatics predictions.

Applied bioinformatics tools and databases to analyze gene sequences, protein structures, and molecular interactions.

Explored the use of artificial intelligence (AI) in drug discovery, including molecular docking simulations and virtual screening of potential therapeutic compounds.

Explored AI-driven biotechnological research and data science applications in bioinformatics.

Fortis Healthcare

Quality and Operations Trainee

November 2022 - November 2022 (1 month)

Mumbai, Maharashtra, India

Streamlined cross-functional communication between Quality Assurance, Operations, Marketing, Patient Experience, Third-Party Administration (TPA), and Outpatient Department (OPD), enhancing hospital workflow and patient care delivery.

Led the planning and execution of four community outreach initiatives, including health camps and awareness events, fostering greater patient engagement and preventive healthcare participation.

International Centre for Stem Cells Cancer and Biotechnology (ICSCCB)

Student Intern

May 2022 - May 2022 (1 month)

Delhi, India

Biotech and Animal Cell Culture Summer Training, at New Delhi

Completed hands-on training in molecular biology, cell culture, and bioinformatics within a research-intensive lab environment.

Conducted mammalian cell culture experiments, including aseptic techniques, media preparation, and cell line maintenance.

Applied molecular biology techniques such as PCR, gel electrophoresis, and DNA/RNA extraction to support experimental workflows.

Supported bioinformatics analyses, including sequence analysis and molecular docking and computational tools for genetic research, under faculty supervision.

Gained exposure to stem cell research, cancer biology, and translational biotechnology applications.

Worked under the guidance of senior researchers, strengthening skills in lab protocols, data accuracy, and research documentation.

Education

New York University

Master of Public Health - MPH, Global Health · (September 2024 - May 2026)

Symbiosis Centre for Distance Learning

Postgraduate Degree, Healthcare Management · (July 2023 - June 2024)

Mithibai College of Arts Chauhan Institute of Science and A.J. College of Commerce and Economics

Bachelor of Science - BS, Biotechnology · (September 2020 - March 2023)

Ramnarain Ruia College - Mumbai

Hsc · (2020 - 2021)
